

“INNOVATE X5” Team

3D Model printing Instruction

Two-part design (IMPORTANT):

1. Control Box (Arduino + circuit)
2. Mini Room Box (Fan / AC / Heater demo)

2. Control Box (Main System)

Size:

- Length: 20 cm
- Width: 15 cm
- Height: 8 cm

structure:

- Arduino mount holes (screw)
- Breadboard flat slot
- Wire (clean routing)

Top:

- Transparent lid
- Text engraved:
 - **Smart Adaptive Temperature Control System**

Front Panel Cutouts:

- ON/OFF button hole
- Reset button hole
- Mode switch (flash switch)
- 16*2 model (LCD) -top of the box

“button holes in Front panel ”

Components mention –in the box model

Arduino Uno mounting space

- Breadboard slot
- Sensor wiring exit holes (side)

3. Output Wire Exit

VERY IMPORTANT

We need 3-5 wires holes in the side of the box for the purpose of use the output.

- Rubber grommet space (optional clean finish)
- Label:
 - FAN prototype
 - AC prototype
 - HEATER prototype

4. Mini Room Box (Output Demo)

Size:

- 15 × 10 × 10 cm

Design:

- Front open (inside visible)
- 3 sections:
 - Cooling (AC)
 - Fan
 - Heating

Mount:

- LED holder slots
- Small fan mounting ring
- Heater LED box slot

5. Branding

Front side:

- **INNOVATE X** (big bold emboss)

Top:

- Project title
-

6. Assembly Type

- Snap fit OR screw type closing
- Bottom removable panel better (maintenance easy)
